Examiner Note: You must sign this form unless it is an Attachment to a signed Office action.

Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Regarding claim 1, King fails to disclose the wings do not protrude laterally over the base part in a flapped in position wherein the upper side of the base part is defined as the surface upon which the joints of the wings are fixed. Thus, a further search of the art is required.

Regarding claim 13, Applicant argued the positioning element does not provide a centering means. However, there is some degree of centering means provided due to relative inner and outer diameters of the positioning element and holding mandrel respectively. Furthermore, the trocar sheath and closure device are not positively claimed .
